**GLORY CSR Report 2018**

**Corporate name**: GLORY LTD.  
**Founded**: March 1918  
**Incorporated**: November 1944  
**Capital**: ¥12,892,947,600  
**Stock listings**: Tokyo Stock Exchange (1st Section)  
**Number of employees**: 3,314 (Group: 9,516)  

**Main Customers**  
- Financial Market: Financial institutions, OEM clients, and others in Japan  
- Retail and Transportation Market: Supermarkets, department stores, retail stores, casinos, OEM clients, and others in Japan  
- Amusement Market: Amusement halls (pachinko parlors) and others in Japan  
- Overseas Market: Financial institutions, cash-in-transit companies, retail stores, casinos, OEM clients, and others overseas  
- Others: Other than those above

**Main Products and Goods**  
- Financial Market: Open teller systems, Coin and banknote recyclers for tellers, Coin recycling modules for ATMs, Multifunctional banknote changers  
- Retail and Transportation Market: Cash monitoring cabinets, Security storage systems, Key management systems, Banknote recycling modules for horse race ticket, Vending machines  
- Amusement Market: Ticket vending machines, Cigarette vending machines, Medical payment lockers, RFID self-checkout systems for cafes, Ballot sorters for handwritten ballots  
- Overseas Market: Card systems for pachinko parlors, Banknote conveyors, Pachinko price dispensing machines  
- Others: Other than those above

**Editorial Policy**

The Glory CSR Report 2018 aims to inform a wide range of stakeholders about the CSR initiatives that GLORY LTD. and Glory Group companies conducted during fiscal year 2017.

This report contains information in line with the Standard Disclosures of the Sustainability Reporting Guidelines, Version 4 set out by the Global Reporting Initiative (GRI). Glory has also completed identifying material issues in line with the relevant processes as defined by the GRI.

The Special Report section showcases Glory’s coin-operated lockers, which were developed to meet new societal needs. The Glory CSR Report 2018 also covers major efforts in fiscal year 2017 related to environmental protection, social action, and corporate governance. Further details can be found on the Glory website.
As Glory enters its next 100 years, we will contribute to the creation of a safe and secure future.

Glory’s 100th Anniversary

In March 2018, thanks to your support, our company marked the 100th anniversary of its foundation. We have come this far thanks to the long-term support of our stakeholders, to whom we offer our deepest gratitude. Our company was founded in 1918, with seven employees, as a repair factory for light-bulb manufacturing devices. Now, the Glory Group has about 9,500 employees, subsidiaries in more than 20 nations around the globe, and offers products and solutions to meet the diverse needs of customers in over 100 countries.

Since our foundation, we have continued to strive to achieve the technological innovation and superb manufacturing that society has sought. Along the century-long path that we have traveled, the cornerstone of our current growth was the development of the first domestically produced coin counter, and its provision to the Ministry of Finance’s Mint Bureau (now the Japan Mint) in 1950. Since then, we have created many products which were the first of their kind in Japan, such as coin wrappers, coin sorters, cigarette vending machines, and coin-operated lockers with coin-operated vending machines, sorters, cigarette wrappers, coin-operated lockers, and coin-operated vending machines, sorters, cigarette wrappers, coin-operated lockers.

To arrive at where we are today, we have created various innovations within business fields related to currency, and we have expanded our market, but our roots remain the philosophy that we have maintained since our foundation, of “continuously striving to benefit people by creating products that have never been seen before.” We have a long and continuous heritage focused on the development of innovative solutions that improve society. This is enshrined in our corporate philosophy with the words “a striving spirit and cooperative efforts.”

Determining Our Long-Term Vision 2028

In April 2018—with our focus on the next 100 years—we put together the ideal image of Glory 10 years from now and set forth the Long-Term Vision 2028, which states “We enable a confident world.” Until now, within the business domain of cash handling, the Glory Group has worked to create an environment in which society can use cash with peace of mind. Going forward, as well as furthering that goal, we plan to enter new fields of business. With the spirit we have inherited from our predecessors of taking on a challenge, and via the application of advanced technology that exceeds the boundaries of cash handling, we will work to create new domains in the four business areas detailed below.

• Various methods of payments: Extend solution portfolio to processing and settlement of electronic payments and digital currencies
• Currency circulation management: Extend capabilities to track and manage cash through its complete life cycle
• Automated society: Contribute to productivity in multi-industry applications of robotics, which can work in harmony with human employees
• Personal identification and authentication: Develop solutions to detect, authenticate, and protect personal identity, enhancing trust and security in society

In order to realize these four new business domains, we will further advance our current core technologies of recognition/identification and mechatronics. We will also work to provide products and solutions that meet customers’ needs by fusing new technologies via the promotion of open innovation, and through a flexible approach to changes in the market environment.

As the first step, in April 2018 we began a three-year planning period with the initiation of our 2020 Medium-Term Management Plan. This plan sets aside a period of preparation for the creation of our long-term vision, and pushes forward initiatives aimed at creating new value. It includes the three basic policies of building foundations for realizing sustainable business management, strengthening collaboration with various partners to solve social issues, and realizing higher productivity and robust corporate constitution that directly generate outcome.

In September 2015, at a United Nations summit, sustainable developments goals (SDGs) were adopted and 17 goals were set. We have linked those goals to our group’s strengths so that by implementing our business strategies we are also working to solve social issues.

We will continue to earn the trust of our stakeholders and strive to be a corporate group contributing to the realization of a sustainable society.

June 2018

Toward the Creation of a Sustainable Society

The Glory Group conducts management based on our corporate philosophy, and we believe that the actions of each and every employee will lead to the realization of that philosophy. In order to share and permeate that philosophy, we translated into eight languages and distributed to every group employee the Guidelines of Glory handbook, which sets forth principles such as our corporate philosophy, management creed, and corporate action guidelines. Furthermore, in 2014, we signed up to the United Nations Global Compact because its 10 principles in the four areas of human rights, labor, the environment, and anti-corruption share the same values with our corporate action guidelines.

In September 2015, at a United Nations summit, sustainable developments goals (SDGs) were adopted and 17 goals were set. We have linked those goals to our group’s strengths so that by implementing our business strategies we are also working to solve social issues.

We will continue to earn the trust of our stakeholders and strive to be a corporate group contributing to the realization of a sustainable society.

June 2018
Glory CSR Report 2018

Corporate Philosophy and Management Creed

We will contribute to the development of a more secure society through a striving spirit and co-operative efforts.

- Through a spirit of continuous development, we will provide products and services our customers can rely on.
- We will build a vigorous corporate group through respect for the individual and teamwork.
- We will endeavor to act as responsible corporate citizens and co-exist harmoniously with society at large.

Corporate Philosophy

- Build foundations for realizing sustainable business management
  - Overseas business
  - Further growth of financial market and acceleration of retail business
  - Domestic business
  - Promote solution proposals

Management Creed

- Strengthen collaboration with various partners to solve social issues
  - Promote new business domains
  - Acquire new core technology
  - Proactive allocation of management resources for new business

2020 Medium-Term Management Plan

Basic Policy

Policy 1
Existing Business
Build foundations for realizing sustainable business management
- Overseas business
- Further growth of financial market and acceleration of retail business
- Domestic business
- Promote solution proposals

Policy 2
New Business
Strengthen collaboration with various partners to solve social issues
- Promote new business domains
- Acquire new core technology
- Proactive allocation of management resources for new business

Policy 3
Management Base
Realize higher productivity and robust corporate constitution that directly generate outcome
- Work-style and operational reform to improve productivity
- Organizational climate reform to realize open innovation

Glory’s CSR Philosophy

Glory believes that CSR (Corporate Social Responsibility) is achieved by putting its corporate philosophy into practice. This means offering cash handling machines and other products and services of high social value, while realizing a safe and secure society.

CSR Promotion Framework

CSR efforts in the Glory Group are led by the CSR Committee, which is chaired by the President and made up of management-level employees. The committee convenes twice a year, at which time it deliberates on the basic direction and plans for CSR management and establishes policies for major annual CSR initiatives.

Glory’s Material Issues

Glory has identified its CSR-related material issues through the following process.

Process for Identifying Material Issues

STEP 1
Find and Extract CSR Issues
Based on international standards such as the Global Reporting Initiative (GRI) guidelines and ISO 26000, the social impact in all stages of the value chain (planning, development, procurement, manufacturing, sales, maintenance, others) were assessed, and CSR issues were found and extracted.

STEP 2
Assess the Materiality of CSR Issues from the Standpoint of Both Glory and Its Stakeholders
A questionnaire was administrated in both the business and corporate departments to assess materiality. Respondents ranked the priority of CSR issues from the two standpoints of ‘materiality in businesses’ and ‘level of impact on stakeholders’.

STEP 3
Experts Assess Validity
Two outside experts assessed the validity of materiality. Based on these assessment results, a materiality map was created and issues were sorted out.

STEP 4
Identifying Material Issues
Based on the materiality map, 11 items considered material issues at Glory were chosen and these were classified into five priority CSR themes. Following approval from management, these were identified as material issues.

Material Issues Identified at Glory

In-House Consideration

Two dialogue sessions were held each year with an outside expert, Junichi Mizuo, President at MIZUO Compliance & Governance Research Office, and Seiichiro Shimamoto, a professor at Kyoto Bunkyo University. In these sessions, the two experts provided Glory with advice on whether there were any shortcomings in the assessed materiality, and how to pursue CSR that matches Glory’s characteristics.

Dialogue with Experts

Two dialogue sessions were held each year with an outside expert, Junichi Mizuo, President at MIZUO Compliance & Governance Research Office, and Seiichiro Shimamoto, a professor at Kyoto Bunkyo University.
Major CSR Initiatives in the Value Chain

These are the major initiatives that the Glory Group is carrying out for each stakeholder category in the value chain.

Planning
- **Customers**
  - Develop products that match customer needs in a timely manner
  - Ensure quality
  - Incorporate universal design
  - Develop products utilizing new technologies
- **Employees**
  - Promote a work-life balance
  - Provide education to improve employee skills
- **Global environment**
  - Energy-induced CO₂ emissions: 16,716 t-CO₂ (3.1% increase over previous fiscal year*)

Development
- **Customers**
  - Ensure quality and pursue appropriate, competitive pricing
- **Business partners**
  - Promote CSR-oriented procurement in unison with suppliers
- **Global environment**
  - Manufacture with an eye to saving resources, recycling, and reusing

Procurement
- **Customers**
  - Ensure quality and reliable supply
  - Shorten lead-time
  - Boost cost competitiveness
- **Global environment**
  - Manufacture with an eye to saving resources, recycling, and reusing

Manufacturing
- **Customers**
  - Ensure quality and reliable supply

  - Protect biodiversity
- **Global environment**
  - Manufacture with an eye to saving resources, recycling, and reusing

Sales
- **Customers**
  - Provide products that match customer needs in a timely manner
  - Provide appropriate information on products and services
  - Properly manage customer information and personal information
- **Global environment**
  - Switch to eco-cars
  - Sell CFC-free cleaning goods
- **Employees**
  - Promote a work-life balance
  - Train employees based on qualification systems

Maintenance
- **Customers**
  - Provide products that match customer needs in a timely manner
  - Provide appropriate information on products and services
  - Properly manage customer information and personal information
- **Global environment**
  - Switch to eco-cars
  - Sell CFC-free cleaning goods
- **Employees**
  - Promote a work-life balance
  - Train employees based on qualification systems

Energy-induced CO₂ emissions: 16,716 t-CO₂ (3.1% increase over previous fiscal year*)

CO₂ emissions from parts and materials procured
- **Global environment**
  - CO₂ emissions from product usage: 185,388 t-CO₂ (28.0% increase over previous fiscal year*)
  - CO₂ emissions from transportation and shipping: 13,144 t-CO₂ (26.5% increase over previous fiscal year*)
  - CO₂ emissions from product disposal: 2,632 t-CO₂ (26.5% increase over previous fiscal year*)

*CO₂ emission increases over the previous fiscal year are due to increases in products volume.
Keyless and Cashless

Glory was the first company in the industry to develop a keyless locker that generates and reads QR codes. When users store their baggage in a locker, they get a receipt with a printed QR code. This is their locker key, which they swipe over the QR code reader to open the locker. An IC card can also be used to do everything from paying for the service to opening the locker door. Because users have either a QR code receipt or an IC card to open the locker, they needn’t worry about walking around with—or losing—a key. This also eliminates the need for personnel to deal with replacing lost keys, exchanging keys, and handling cash.

Effective Use of Limited Space

In February 2018, Glory developed control software that can be installed in baggage storage lockers already placed in train stations so they can also be used for receiving deliveries. This means people can use the lockers to either store their baggage or to pick up delivered packages. The result is greater convenience for locker users and greater operational efficiency for the train stations installing these lockers.

Convenience for Users, Efficiency for Delivery Companies

In Japan, the increase in online shopping is creating a serious shortage of employees for delivery companies. Glory helps solve this problem with the development of a locker specifically for receiving delivered packages. These lockers have been installed in a wide range of locations, including train stations and supermarkets. Online shoppers can pick up their goods anytime, without having to worry about what time the goods will be delivered to their homes or office. Delivery companies enjoy greater efficiency since there is no need to return when customers are not at the delivery address.

History of Glory’s Coin-Operated Lockers

1960s  First Made-in-Japan Coin-Operated Locker with Extendable Time Limit

At the time, coin-operated lockers could only be used for one day, and had to be cleared out manually for use by someone else the following day.

In 1965, Glory developed the first made-in-Japan coin-operated locker with an extendable time limit. The proprietor of the coin-operated locker needed only to re-set the extendable time limit once a day at a certain time, and it could then be used for 96 consecutive hours. This development validated the functionality and marketability of terminal coin-operated lockers and greatly contributed to the advancement of coin-operated lockers as a whole.

1970s  Expo ’70 Provides Impetus for Spread of Coin-Operated Lockers

In 1970, a total of 531 Glory coin-operated lockers were installed in Osaka during Expo ’70, in Shin-Osaka Station, Osaka Station, and Ibaraki Station on the Japanese National Railways (now JR). Compared to baggage check-in counters, they offered smoother drop-off and pick-up of baggage, helping to alleviate crowding among tourists. This provided a need for the further rollout of coin-operated lockers, as installations spread nationwide in locations such as train stations, airports, golf clubs, and amusement parks.

1990s  Excellence in Safety, Convenience, and Design

Throughout the 1990s, Glory continued to develop lockers that met the changing requirements of the times. The company sought to improve security and coin identification accuracy by equipping coin-operated lockers with electronic locking systems that better prevent theft, and coin-sorting functions that use electronic sensors. Convenience was further improved by widening locker openings to make baggage insertion and removal easier, and adopting time-usage-based fee systems. Glory also developed products with patterns on the doors to help lockers match their surroundings and improve the aesthetics.

Today  The Journey Continues

As a coin-operated locker pioneer, Glory has for over 50 years been pursuing convenience for customers and improvements in function and quality. There are currently more than 20,000 Glory lockers in the field, providing services for users in all types of locations including train stations, airports, leisure facilities, supermarkets, and more. Whether it’s lockers for receiving deliveries, or coin-operated lockers for storing freshly purchased goods, Glory continues to meet the demands of online shopping and the changing lifestyles of customers.

In 1990, Glory developed keyless lockers that generate and read QR codes. This service allows users to access their lockers without needing to carry a key, which reduces the need for personnel to replace lost keys, exchange keys, or handle cash. This innovation has helped Glory meet the changing needs of the times.

In February 2018, Glory developed control software that can be installed in existing baggage storage lockers. This software enables the lockers to be used for receiving deliveries, allowing users to either store their baggage or pick up delivered packages. This increases convenience for locker users and operational efficiency for the train stations that install these lockers.

Glory’s coin-operated lockers meet the needs of the increasing numbers of inbound tourists and the continued growth of online shopping.
Based on its corporate philosophy, Glory is pursuing sound and efficient business management that ensures the trust and support of all stakeholders.

**Corporate Governance**

Glory’s corporate philosophy guides its efforts to continuously improve corporate value through sound and efficient business management, so that the company can exist in harmony with society and earn the trust and support of all stakeholders. None of this can be achieved without a firm commitment to the continuing improvement of corporate governance. Glory will continue its efforts to strengthen the supervisory and executive functions of management, accelerate decision-making, ensure transparency and objectivity, and enhance compliance management.

**Corporate Governance Framework**

Glory adopts an audit and supervisory board system. This means the company’s Board of Directors, which includes two outside directors, makes decisions on important matters and oversees business execution, while the Audit and Supervisory Board oversees the actions of the Board of Directors. An executive officer system allows the company to separate the management supervisory and business executive functions, thereby enabling speedy and efficient business administration. In addition, committees such as the Nomination Advisory Committee and the Compensation Advisory Committee serve to boost transparency and objectivity when making important management decisions.

Furthermore, to maintain and improve the efficacy of its Corporate Governance Guidelines, Glory has strengthened its group-wide risk management and enhanced compliance management.

**Risk Management**

Glory has a Risk Management Committee, which is chaired by the President and which has the purpose of maintaining and strengthening risk management for the entire Glory Group. The committee regularly conducts risk assessments and determines the divisions and individuals responsible for each risk item. It works with these divisions and individuals to implement precautionary measures against risks during normal times and to secure and improve a system that can respond promptly in times of crisis.

In fiscal year 2017, as well as undertaking a review of the company’s risk management rules and risk evaluation standards, each group company also completed an analysis and evaluation of its own operations, using those same standards. Through measures such as these, Glory has strengthened its group-wide risk management structure.

**Compliance**

Glory has a Compliance Committee as one way to maintain and improve its compliance framework. This committee—which is chaired by the President and which includes two outside experts (attorneys at law)—deliberates on important compliance-related issues concerning the Glory Group. Glory also has in place four compliance helplines (including one outside helpline) in Japan. These helplines enable Glory to detect and correct problems at an early stage, while protecting those seeking consultations.

In addition, Glory provides education to employees to thoroughly familiarize them with compliance. In fiscal year 2017, Glory also held e-learning and group training sessions for group companies to further reinforce information management and harassment prevention.

By keeping CSR in mind as we carry out core operations, we can further enhance Glory’s raison d’être.

Offering objective support based on own experience as a manager and engineer

At Glory, we feel that, as we head toward the 100th anniversary of the company’s foundation, we are entering a period of dramatic change. Drawing out the potential of our engineering and our personnel is key to achieving sustainable growth, and our Board of Directors conducts very active and meaningful discussions on this topic. From a standpoint of not participating in business execution, I regard being able to share my opinion from an objective point of view as my most important role. I am requesting the creation of new business and changes to business models. I want to help push forward the company’s initiatives by offering advice based on my experience as a manager and an engineer.

**Governance amid continued globalization**

Social demands regarding corporate governance have become stricter in the last few years. At Glory we assess our governance to be functioning appropriately, but such demands are growing along with the times. Furthermore, because the common sense that forms the standard of governance varies according to country and region, we must integrate each nation’s laws and culture into Glory’s governance. In society now, if a problem occurs it spreads instantly and often becomes a bigger issue than it really is. From the saying “problems arise at the edges,” even our group companies in Japan and overseas must pay careful attention.

It is important to contribute to society via our core business

In recent years there has been an increase in corporate initiatives in line with Sustainable Development Goals (SDGs) or Environmental, Social, and Governance (ESG). I believe that we can make the greatest contribution to realizing a sustainable society via our most socially influential operations, which is our core business. For Glory, its offering of accurate, easy-to-use products and services that contribute to improved production efficiency will result in a contribution to society. I believe that Glory can improve its social raison d’être by pleasing stakeholders and remaining conscious of CSR while engaging in its core business.
Quality Initiatives

Glory provides products and services in a timely manner to win the confidence and satisfaction of customers.

We will provide products and services in a timely manner to win the confidence and satisfaction of customers.

1. By sensing advanced market needs, develop products that are attractive to customers.
2. Establish the quality of products at the earliest stage possible.
3. Place importance on customers’ first impression of quality and on after-sales services.

Providing Peace of Mind to Customers Worldwide via Maintenance Services

In order for its customers worldwide to be able to use its products with peace of mind, the Glory Group maintains a direct sales and direct maintenance network across 24 countries outside of Japan, including the U.S., Europe, and Asia. Currently, that network includes around 2,000 maintenance staff members and maintenance contracts with customers for a total of more than 240,000 products.

Glory receives inquiries from customers regarding issues with its products or requests for repair via call centers set up at each of its bases. When it is determined that a visit by Glory maintenance staff is required, a staff member close to the customer’s location is quickly dispatched. Glory has put in place a thorough support structure in order to solve customers’ problems as quickly as possible.

Initiatives to Improve Maintenance Quality

In order to provide high-quality maintenance services that exceed the satisfaction of its customers, Glory employs a variety of measures, including group skill training and joint initiatives with each region of the world.

Joint Initiatives with Each Region of the World

1. Senior Service Leadership Meetings

Maintenance managers from each region of the world meet to share their initiatives and success stories regarding each regional maintenance business, and also to share their progress in measures being undertaken on a global scale. In order to provide maintenance services that meet the diverse needs of customers, Glory aims to improve the maintenance quality of the entire Glory Group and boost the level of each of those operations.

2. Annual Quality Meetings

Maintenance quality managers from each region of the world and members of the development division and quality assurance division meet to share information on their maintenance activities and on the operational and quality conditions of products in the markets of each region. Glory improves its product quality by feedback from the information gained from maintenance calls.

3. Fostering Personnel Who Can Maintain Quality

Group Skill Training

Aiming to improve the expertise and response skills of technical staff, Glory conducts group skill training by region or country. The staff responsible for each product model train the technical staff in the products being offered in their market. Glory is enhancing the effectiveness of this training by having the trainees undergo preparatory study via an online education system ahead of the training day.

4. Technical Staff Cup

The Technical Staff Cup that Glory has been running in Japan for more than 20 years, Glory also now runs in the North American region, the EMEA* region, and the Asia and China region. Technical staff from each region gather and compete against each other by using the expertise they have accumulated on a daily basis, increasing their motivation and communication between them.

5. Initiatives to Improve Maintenance Quality

- In order to provide high-quality maintenance services that exceed the satisfaction of its customers, Glory employs a variety of measures, including group skill training and joint initiatives with each region of the world.

- Senior Service Leadership Meetings

Maintenance managers from each region of the world meet to share their initiatives and success stories regarding each regional maintenance business, and also to share their progress in measures being undertaken on a global scale. In order to provide maintenance services that meet the diverse needs of customers, Glory aims to improve the maintenance quality of the entire Glory Group and boost the level of each of those operations.

Next-Generation Manufacturing for the Creation of a Collaborative Environment

As labor shortages have become an urgent social issue in Japan, expectations have grown that robots could be an effective solution. With the goal of applying at production sites outside the company the production technology and knowhow that it has cultivated so far, in April 2017 Glory began the ASROF* system integration business for the practical use of collaborative robots. By offering a total solution from robotic line automation to development of peripheral equipment and operational knowhow and after-sales service, Glory is creating a collaborative environment for robots and humans. It is able to flexibly respond to multi-product, variable-volume production and achieve further labor savings and quality stability in a wide range of industries, including the fields of food and cosmetics, thereby contributing to next-generation manufacturing.

Customer Case Study: Sanshu Seika Co. Ltd.

For over 60 years, Sanshu Seika has been producing and selling unique rice crackers and pasta snacks using special ingredients and traditional manufacturing methods. It has striven to maintain an easy working environment for its employees. In a joint development effort with Sanshu Seika, Glory installed ASROF into its line for packing its products into boxes.

Background to the installation

- Amid labor shortages, the company wanted to ensure stable quality and improved productivity in its wrapping process, which is the process that requires most labor.
- The company wanted to use a humanoid robot with a compact line that could adjust quickly and flexibly to multi-product, small-volume production.

Results of the installation

- The move allowed employees to devote their time to the work considered as attractive to customers.
- With the humanoid robot being programmed so that a simple operation can smoothly convert it to handle a different production item, it was able to efficiently perform multi-product, small-volume production.

ASROF’s duties

- From the start of the installation, the robot manages all tasks throughout the entire production line.
- It can adjust robot hand parts to suit package shapes and product items onsite—even where multiple humanoid robots are installed—production will be able to continue without halting the line. That will lead to increased customer satisfaction. We anticipate further development from Glory.
Promoting Diversity
Glory aims to build a workplace where every employee, regardless of gender, nationality, sexual orientation, or disability, can utilize his or her talents to the fullest.

Equal Opportunities for Women
Since fiscal year 2011, Glory has been focusing on ensuring gender equality and delivering equal opportunities for female employees. In fiscal year 2016, Glory formulated an action plan based on Japan’s Act on the Promotion of Women’s Participation and Advancement in the Workplace, and has been creating a more inclusive workplace ensuring there is more female representation.

Employing People with Disabilities
In 1999, GLORY Friendly Co., Ltd. was established to give people with disabilities an opportunity to make a living and contribute to society. Under the slogan “Foster a creative working environment by valuing communication with one another and fully demonstrating our skills,” employees conduct duties such as company janitorial work and landscaping, in-house documentation and mail delivery, and waste disposal. Glory fully complies with all equal opportunity laws and never discriminates on the grounds of disability.

Work-Life Balance
Glory has in place numerous initiatives aimed at promoting a work-life balance. These initiatives enable employees to match their job and work schedule to their lifestyle while maximizing their abilities and career potential.

- **Work-Life Balance Support Systems**
  - **Balancing Work and Parenthood**
    Since April 2017, Glory has provided subsidies for parents working full-time at Glory sites (other than the Glory head office) to hire childcare services. The company has also created an in-house daycare center called “G Kids Home” for children of full-time Glory employees. Such measures support employees by placing an equal importance on career development and parenthood.
  - **Balancing Work and Caregiving**
    Glory also helps employees work with peace of mind while caring for sick or elderly family members. Glory has improved and expanded its employee support system to include extended periods for nursing care leave and extended periods during which employees may reduce their daily working hours in order to look after a sick or elderly family member.
  - **Reducing Long Work Hours**
    Glory strives to modify work processes and schedules in order to reduce constant bouts of long work hours. This helps to bolster employees’ mental and physical well-being and maintain their motivation for work. In an effort to impress upon employees the importance of working efficiently so as to avoid overtime, Glory has instituted “no-overtime days” and “no-overtime weeks.” And to encourage employees to go home on time, the company has also put a limit on the number of overtime hours they can work each day.

Fostering Globally Minded Human Resources
Today, overseas sales account for approximately 47% of Glory Group consolidated net sales, and overseas employees account for approximately 39% of all Group employees. Given this group make-up, the company is placing special emphasis on fostering human resources that can support international expansion. It is bringing this objective about through programs such as the short-term overseas study program and the GUTS program.

- **Short-Term Overseas Study Program**
  This program sends participants to language schools in the U.S. or the U.K. for three months so that they can acquire the language and business skills needed to do business on a global scale. By exposing themselves to diverse ways of thinking, values, and cultures, employees develop into individuals with not only improved language skills, but also a global perspective. In fiscal year 2017, four employees took part in the study program.

- **GUTS Program**
  Glory has developed a program called GUTS (Glory Up Technique Shōshūdankaizen [“small-group reforms”]), which aims to boost employees’ problem-solving abilities and their capability to think and act for themselves by taking on operational reforms. It also aims to create a livelier work environment. GUTS is a world-wide initiative; it is also taken up at production group companies including those overseas. In fiscal year 2017, there were a total of 340 action themes.

A company-wide GUTS conference is held annually at the Glory head office. At this event, outstanding circles, including those from group companies are selected to give presentations on their achievements, and best practices are shared company-wide.

Respecting Human Rights
Glory helps employees achieve their personal career plans by providing systems and measures that support the development of their capabilities and that further their careers.

- **Employee Awareness Surveys**
  In April 2017, Glory conducted a survey targeting its executive officers and employees, on topics such as work motivation, awareness of compliance, and understanding and implementation of Glory’s CSR and management plans. This year’s survey revealed that many improvements have been made since the previous survey, including feeling stuck in a rut at work, feeling overwhelmed by the volume of work, and the level of penetration of the corporate philosophy. On the other hand, the survey revealed that the understanding of the management plan and putting it into action, feeling convinced with the fairness of evaluation, and awareness of the future prospect of the company was on the decline among general employees, particularly those in lower ranking positions.

Taking these results into consideration, for fiscal year 2018, Glory will commit to the following actions: permeate the corporate message company-wide; appropriate operation of the personnel system; and create an environment in which employees, company-wide, can freely take on challenges.

- **Career Training**
  Glory holds level-specific career training for its employees. One of these is the Self-Inquiry Adventure Training, which is held for employees when they first join Glory, on their fourth year at the company, and when they turn 30 years old. This program allows them to envision a career plan and to grow into competent personnel who can achieve their career goals. In fiscal year 2017, a total of 187 employees took part in the program.

For details, please visit Glory’s website.
Social Initiatives

Glory will harmonize and advance the interests of the company and of society.
As a good corporate citizen, it will also actively participate in social action programs.

Supporting the Promotion of Sports

Glory Sponsors Victoria Himeji Volleyball Team

Glory has signed a sponsorship agreement with Victoria Himeji, Victoria Ltd., which manages the Victoria Himeji women’s volleyball team (general manager: Masayoshi Manabe, coach: Yoshide Takehita). Based in Himeji, Hyogo Prefecture, Victoria Himeji is Japan’s first professional women’s volleyball team.

Besides playing in various volleyball tournaments, the team promotes the sport in the community through activities that include appearances on talk shows and volleyball clinics for elementary and junior high school students. Glory strives to use sponsorship as a way to stimulate community-level sports and support the development of the next generation.

As a company founded in Himeji, Glory fully understands Victoria Himeji’s vision—“From Himeji to the world”—and will support the team in all its endeavors.

Hands-on Science Classes

In hands-on science classes held during the summer holidays, elementary school students build their own science projects, experiencing firsthand the wonders of science and in the process cultivating their creativity and unique powers of imagination. Glory employees take part by helping the students with their projects.

In fiscal year 2017, science classes, 200 students from grades three to six took on the challenge of building eight-legged robots using a crank mechanism.

Children’s Theater

The Children’s Theater project is held with the goal of enriching the aesthetic sensibilities of youngsters and planting in them the seeds of creativity.

In fiscal year 2017, a total of 2,910 elementary school students and their parents were invited to performances of the musical, Children in the Storm, presented by the Shiki Theater Company.

Hands-on Classes for Parents and Children

This program is held every spring and autumn with the goal of stimulating community-level sports and support the development of the next generation.

In May 2017, a total of 80 children and parents, selected by a lottery, went to see the Shiki Theater Company’s performance of the musical Cats, followed by a backstage tour. Later that year, in November, 300 students and their parents were invited to see a hot-air balloon at a local elementary school. Participants learned how hot-air balloons work and took turns boarding one anchored at the school.

Volunteering in the Bollywood Farm Tour

In June 2017, five employees of Glory Global Solutions (Singapore) Pte. Ltd. volunteered in the Bollywood Veggies Farm Tour, an event held for children living in facilities run by Canossaville Children and Community Services in Singapore. The fun- and activity-filled day saw the children touring the Bollywood Veggies farm to see gardens of fruits, vegetables, and herbs, and learning how produce is grown.

Volunteering in the Bollywood Farm Tour

In November 2017, seven employees of Glory Global Solutions (Spain) S.A. took part in the Run for the Children charity race. The event’s aim is to contribute to the advancement of research into intensive care and to promote healthy lifestyles. Proceeds gathered at this event go towards supporting activities of a biomedical research foundation at the Niño Jesús University Children’s Hospital.

Protecting the Marine Environment in the Philippines

In October 2017, GLORY (PHILIPPINES), INC. donated “reef buds” as its contribution to an ocean regeneration project in the municipality of Rosario in the province of Cavite. This artificial coral is made from low-impact material and provides a habitat for sea organisms. Reef buds also contribute to the stabilization of the ocean’s pH balance, helping prevent degradation of the marine environment caused by increasing atmospheric CO2 concentrations.

Making Wood Block Puzzles from Sustainable Wood

With the goal of protecting the environment and contributing to children’s education, Glory creates children’s building blocks and puzzles from sustainable wood (wood from forest thinning) with the support of the Lifestyle Research Institute of Forests NPO.

For fiscal year 2017, a total of 133 employees at nine local Glory offices in Japan, including those in Tokyo and Kyushu, took part. The participants used masking tape to color cubes cut from sustainable wood to make three sets of wood block puzzles (totaling 378 pieces). The completed puzzles were donated to a daycare center in Kumamoto, Kyushu.

Cosponsoring the World Heritage Himeji Castle Marathon 2018

Glory was a cosponsor of the World Heritage Himeji Castle Marathon 2018, held in February. Fifty Glory employees volunteered on race day to assist approximately 7,000 participants running the full marathon.

Several Glory employees also took part in the race itself, wearing Glory 1-chirts bearing the 100th anniversary logo as they made a spirited run to the finish line.

Fostering the Next Generation

GLORY Foundation for Elementary School Students

In March 1995, Glory established the GLORY Foundation for Elementary School Students with the goal of supporting the sound development of young people. Through the foundation, the company conducts sports, arts, and cultural activities that have included hands-on science classes, hands-on classes for parents and children, and children’s theater. A cumulative total of 99,031 people have taken part in these activities since the foundation was launched.

The foundation also provides assistance to organizations that work towards the sound development of elementary school students through activities in sports, science, and culture.
CO2 emissions are lower-impact delivery points. Furthermore, by switching transport from destinations on to one truck that makes trips to various efforts including loading products bound for multiple products can be sent together to delivery points. In other companies to ensure both their products and Glory convenience stores use approximately 23% less electricity they conform to regulations on chemicals contained in efficiency at least 15% better than existing products and if Glory certifies products as G-Eco products if they satisfy products that minimize environmental impact throughout themes of the prevention of global warming, management vision, the entire Glory Group is taking action on the focus: products, business, and awareness. Under this formulated an environmental vision with three areas of environment.

Reducing Environmental Impact from Business Activities

Promoting Environmentally Friendly Logistics

Glory strives to be environmentally friendly at its distribution centers. Collaboration is carried out with other companies to ensure both their products and Glory products can be sent together to delivery points. In addition, greater shipping efficiency is achieved through efforts including loading products bound for multiple destinations on to one truck that makes trips to various delivery points. Furthermore, by switching transport from trucks to lower-impact methods such as railways and ships, CO2 emissions are cut and energy is used more efficiently, resulting in a lower impact on the environment.

Using Environmentally Friendly Nesting

Glory designs products based on the concept of nesting* right from the development stage. By conducting design with consideration for material thickness, necessary amount, and molds of the components used in the product, nesting can be done for each product and component processing can be carried out according to production plans. In addition, nesting allows components to be designed on to and cut from a metal sheet to make the most efficient use of the material. This reduces the amount of material waste and has resulted in a yield rate** as much as 15% or higher than previously.

Nesting means that only the necessary amount of product is produced, and only when needed. The result is the effective use of resources.

Preserving Biodiversity

Since fiscal year 2011, Glory has strived to protect and maintain biodiversity through initiatives such as forest conservation activities and nature appreciation events at the Glory Yumesaki Forest (Himeji City, Hyogo Prefecture), with the aim of conveying to young people the importance of nature. In fiscal year 2013, Glory began expanding its activities to the Kanto region and in fiscal year 2017 it held a forest conservation activity in Hachino City, Tokyo. In addition, a tree-planting event was held in Yamanoto Town, Miyagi Prefecture, where Glory employees planted 100 Japanese black pine trees to help restore a coastal disaster prevention forest that had been ravaged by the tsunami triggered by the 2011 Great East Japan Earthquake.

Another example of group-wide contributions to biodiversity preservation is the participation by employees of GLORY PHILIPPINES, INC. in the Adopt-A-Tree Park Program since fiscal year 2011.

Environmental Initiatives

The entire Glory Group works to protect the environment under the Glory Environmental Vision.

Stakeholder Dialogue

Glory takes the opportunity to introduce the Glory Group’s products and services to customers in Japan and around the world and to hold dialogues with them.

In March 2018, Glory opened its renovated Glory Next Gallery, the head office showroom, where visitors can experience the history and technologies behind the company’s progression story. Divided into four zones—Prologue, History & Technology, Core Technologies, and Glory Future—it features actual products and videos that take visitors through the company’s history, products, and technological developments since its foundation.

Glory further communicates with customers in Japan and overseas by holding private exhibitions and by taking part in major trade shows. Glory also invites its customers to the Himeji and Saitama factories, so they can see the production sites for themselves. This gives them a deeper understanding of the company’s production system and quality control.

Dialogue with Shareholders and Investors

Glory strives to build long-term trusting relationships with its shareholders and investors. To this end, the company engages in constructive dialogue to deepen their understanding of Glory’s management policy and business activities. It also works to increase management transparency through prompt, accurate, and fair information disclosure. In fiscal year 2017, Glory hosted a tour of the Saitama Factory for institutional investors, a tour of the showroom for shareholders, and company briefings for individual investors.

The Glory corporate website has a special section for shareholders and investors. Here, quarterly financial reports, shareholder reports, annual reports, and other materials are disclosed in a timely manner for the convenience of shareholders and investors.

Dialogue with Employees

Since fiscal year 2012, Glory has held meetings in which the president and other senior executives provide updates to employees. The president explains the company’s philosophy and the state of its business. The goal of these meetings is to enhance employees’ sense of involvement in business management and to boost their motivation. In fiscal year 2017, these meetings were held at nine locations throughout Japan. In addition, through site visits, in-house events, and group company visits, senior executives can interact closely with employees, fostering a sense of oneness among everyone in the Glory Group.

Once a year since fiscal year 2008, Glory has held a tour of its head office for families of employees. Family members get to view the workplace, eat at the company cafeteria, and meet the president.

Third-Party Opinion

About the Glory CSR Report 2018

- Glory’s CSR Advancements Described in the CSR Report 2018

This year’s CSR Report reveals the following progress from the previous year:

(1) The company has established its new Medium-Term Management Plan, in which the most obvious policies are the change from last year’s “enhance profitability” to “realize sustainable business management,” and from “meet market needs” to “strengthen collaboration with various parties to solve social issues.” Glory shows an awareness of Sustainable Development Goals (SDGs) as it brings sustainability and collaboration to the forefront. Glory has responded to my third-party opinion of last year: it has shifted its management focus by taking a broader vision and a long-term view as it approaches its 100th anniversary.

(2) In the process for identifying materiality (material issues), 11 items were chosen and classified into five priority CSR themes. For example, two years ago in the third-party opinion, I pointed out that the company should formulate a medium-to-long-term strategy that allows it to seamlessly link key performance indicators (KPIs) in CSR with KPIs for raising corporate value, and that it should establish concrete action plans and KPIs for progress management. Glory did these and has made incredible progress as a result.

(3) Such progress can also be seen in the commitment of top management. Glory states that it will “strengthen collaboration with various parties to solve social issues” in its second century and has shown that it is working to solve social issues through its business strategy, in line with the SDGs.

(4) In the area of governance, Glory revised its risk-management rules and risk evaluation standards in 2017, and the report shows a strengthened system under which the entire Glory Group is carrying out risk analysis and assessment under the same standards.

(5) In the area of quality initiatives, the report introduces Glory’s Automation Smart Robot for Future (ASROF) and its fascinating application to show how the company is creating environments in which humans and robots can work together in harmony.

(6) In social initiatives, the report shows the many ways Glory works to be a good corporate citizen, through activities to foster the next generation and to contribute to communities around the world. (7) In environmental initiatives, Glory describes its success in areas such as improving resource productivity through the adoption of recycling.

- Looking Ahead to the Next 100 Years

In this year’s report, Glory states its commitment to pursuing sustainability in its second century of business as it works together with society to solve social issues.

I am studying financial data covering more than 30 years of over 80,000 listed companies in 148 countries worldwide. Research has revealed issues such as how companies distribute their added value between workers and investors, and the truth about how companies avoid taxes. In view of the impact that companies have on society, I think that there is a bigger-than-ever role to play and that collaboration among companies is crucial to achieving what Glory calls “creating shared value (CSV).”

Mother Teresa once said, “If you want to bring happiness to the world, go home and love your family.” I believe that the same can be said of achieving the SDGs: all organizations must take good care of the community and the people who live there. The fact that Glory has always contributed to communities in a down-to-earth way is something we know from the company’s CSR report and firsthand from its stakeholders. I believe this will lead to the creation of further corporate value in the company’s second century of business.

Glory’s Response

We once again offer our sincere thanks to Professor Saka for her valuable remarks on our CSR efforts.

Our 2020 Medium-Term Management Plan, which we announced in May 2018, is the first step towards realising the Long-Term Vision 2028, our target for 10 years from now. Amidst the spread of fintech, the diversification of payment methods, and a rapid move towards a cashless economy, we vow to continue with our existing businesses while opening new business domains in which we collaborate with various partners to solve social issues in order to realise new levels of trust that we can provide to customers. Professor Saka has rated Glory highly on these initiatives from the standpoint of SDGs, and this motivates us to work even harder in the future.

Future efforts are aimed at achieving our long-term vision, which states “We enable a confident world.” We will ensure that our stakeholders receive thorough and periodic reports on these efforts.
